

2 — Component: .env-hatch

ENVIRONMENT TEXTURE

USE. Diagonal stripes on the diagram panel. Reads as a road, a workbench, a construction site — use when the metaphor has a physical surface (streets, factories, workshops).

```
<div class="dg env-hatch"> ... </div>
```

ENVIRONMENT · HATCH

- ① **Note.** Stronger personality than dots; pair with solid (never dashed) content boxes so the stripes do not fight the content.
