

6 — Component: .bldg

OBJECT INSTANCE

USE. A building unit with lit windows: a component instance, an object, anything that gets constructed and can be demolished. Pair with `.ghost` + `.strike` for the destroyed version — the wrecking-ball move.

```
<div class="bldg"><div class="bldg-name">ArticleView</div><div class="bldg-wins"><div class="bldg-win"></div><div class="bldg-win"></div></div><div class="bldg-sub">draft inside</div></div>
```

OBJECT · BUILDING

① **Note.** Lit windows = live state inside. A demolished building with dark windows needs no extra caption.
