

10 — Component: .watermark

DEVICE ATMOSPHERE

USE. A giant faded glyph behind the content: `{ }` for scopes, `λ` for functions, a rune for its own card. Adds depth and personality at zero cost to clarity. Parent panel needs `position:relative`.

```
<div class="dg" style="position:relative;"><span  
class="watermark">{ }</span> ... </div>
```

① **Note.** Keep opacity near 0.07: visible on screen, a whisper in print. Always behind the content, never beside it.
